PROFESSIONAL EXPERIENCE

Project Co-Ordinator

Shakti Enterprise | Nov 2025 - Present

- Coordinating projects and ensuring timely completion
- Leading teams and providing support where needed
- Managing client relationships and communicating project updates
- Overseeing project budgets and helping in resource allocation

Web Developer

Shakti Enterprise | April-2024 - Oct 2025

- As a Web Developer, I was responsible for troubleshooting and resolving client-side issues in web documents and applications using HTML, CSS, JavaScript, and Bootstrap.
- This included identifying and fixing errors in web pages, improving functionality, and ensuring cross-browser compatibility.
- I also optimized the user interface for better performance and usability, leveraging Bootstrap for responsive design. Additionally, I collaborated with cross-functional teams to implement solutions that met both technical requirements and user needs.
- Conducted quality assurance checks, generated QA reports, and resolved linguistic/technical issues.

Web Developer

Technoriya ERP Solutions | Jan 2023 - Mar 2024

- As a Web Developer, I am responsible for creating responsive websites for clients, ensuring seamless functionality across devices. My tasks include managing databases and server configurations on cPanel and GoDaddy, as well as working with XAMPP for local development.
- Additionally, I design company profiles, banners, and advertisements using Canva to support marketing efforts. Built responsive websites using HTML5, CSS3, Bootstrap, PHP, Mysql and JavaScript.
- Collaborated with UI/UX designers to implement clean, user-friendly designs that adhered to best practices for accessibility and mobile-first development. Enhanced site performance through optimization techniques.

Projects

Wedding Hall Booking System

- Developed an easy-to-use website for customers to view and book function halls for events like weddings and parties.
The project included: -
- **Frontend:** Built a simple, responsive design using HTML, CSS, and Bootstrap for easy navigation. Interactive Features: Added JavaScript for real-time booking, availability checks, and interactive forms.
- **Backend:** Used PHP to manage bookings, process forms, and handle customer data. Database: Designed a MySQL database to store hall details, bookings, and customer information. Online Booking: Enabled customers to check availability and make bookings directly on the website.
- **Outcome:** The system made it easy for customers to find and book halls online, leading to increased user engagement and smoother operations for the hall management team.
